

IVC-5

Pre-Owned
Cut and Roll Machine

LOAD CAPACITY

Will fully process goods up to 15' wide. Machine features a material removal device on both the roll-up and load cradle.

EASILY MOVED

Industrial strength casters allow the IVC-5 to easily be moved on a warehouse floor. Pneumatic powered brakes raise the casters off the floor and keep the machine stationary when in use.

CIRCULAR CUTTER

Self-sharpening circular blade rotates as it moves down the cutting track. Hold down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency.

SIMPLE OPERATION

Directional switches run the machine in forward or reverse. Run button engages the rollers or use the wrap around foot cable to operate the machine away from the control panel. Joystick controls operate the cradles.

VARIABLE SPEED CONTROL

Speed control allows the user to choose a comfortable speed or slow the machine down for material inspection.

PLC COMPUTERIZED CONTROLS

PLC interface control system includes an auto-stop foot & inch counter, cut storage system, security keypad, cut counter, multiple product settings and more.

PNEUMATIC CONTROLS

Air powered lifting brakes, cutting bar, roll-up arm and removal devices help increase operator efficiency.

SPECIFICATIONS

Dimensions: 19' long x 7' wide x 3' 6" high

Power Requirements: 220 volt – single phase, 15 amp

Required Air Source: 120 PSI

Blades: 5 1/2" circular, beveled edge
