ABOUT US

Our Story

Since 1990, Accu-Cut has been dedicated to designing, building, and supporting cutting and rolling machines that help flooring professionals do more in less time. As a division of Brockie International, we have spent more than three decades serving thousands of customers across North America and around the world, earning a reputation for reliability, innovation, and long-term customer support.

Built for the Production Floor

From the beginning, our focus has been simple: build high-quality, practical machines that solve real problems on the production floor. Over the years, that commitment has allowed us to steadily grow our customer base while maintaining strong, long-standing relationships with the customers who have trusted Accu-Cut for decades. Many of our earliest customers continue to rely on our equipment today—a testament to both our machine durability and our service philosophy.

Designed to Improve Productivity

Accu-Cut machines are engineered to increase productivity, improve accuracy, reduce waste, and allow one person to safely and efficiently handle tasks that once required multiple employees. Clean cuts, accurate measurements, improved inventory control, and reduced physical strain are core benefits built into every machine we produce. We believe equipment should make jobs easier, employees happier, and businesses more profitable.

Technology & Innovation

Innovation has always been a core part of who we are. For years, we have worked closely with leading software providers in the flooring industry to integrate floor covering software directly with Accu-Cut machines. This allows customers to electronically send cut information from their computer straight to the machine, helping eliminate cutting errors, improve inventory tracking, generate reports, and streamline daily operations.

Service You Can Rely On

Just as important as the machines themselves is the support behind them. We take pride in offering responsive service, training, and long-term parts availability—support we would expect if we were the customer. Whether you operate a single location or manage multiple stores, our goal is to provide equipment and service you can depend on for years to come.

Our Commitment

At Accu-Cut, we stand behind our machines, our people, and our customers—and we invite you to put us to the test.

What do **floor-covering dealers** have to say about their **Accu-Cut Carpet Cutting machines**?

"It's been a miracle worker. It makes us wonder why we didn't buy one 20 years ago."

Dusty Ware
Floor To Ceiling
Ottumwa, Iowa

"One man can now safely do what it took several men previously."

Stan Mac Intyre
Cohens - Carpet One
New Foundland, Canada

Best Buy Carpet Outlet
An Abbey Carpet & Floor Showroom

"We've had the machine over 20 years and it's probably the best investment we've made"

Al Smith
Best Buy Carpet Outlet
Great Bend, KS

"I couldn't imagine doing business without it that's for sure."

Leann Ellenburg
Cartersville Flooring Center
Cartersville, GA

"What used to take 1.5 to 2 hours, can now be done by one person in 25-35 minutes."

Chad Mohr
Star Lumber
Oklahoma City, OK

Fenway Floors

"Don't waste time, buy it, it will save you money."

Gary Klotzko
Fenway Floor Covering
New Rochelle NY

"It's been one of the best investments we've had for the company. Basically it's took a three man job and turned it to a one man job."

Dan Hayes
Hi Tech Turf
Flintshire UK

Sommers Interiors

"We have had our Accu-Cut Crossbow for almost 12 of our 38 years in business and I can't imagine operating without it."

Chad Sommers
Sommers Interiors
Jefferson City, MO

"Thanks for the man hours, our knees off the concrete, and the thousands of \$\$ we saved."

Joe Rogers
Southside Bargain Center
Winston-Salem, NC

"It's the best. Highly recommend it. A labor saver. I don't know how we did without it."

Marshall Fox
Fox Floors
Ocean Township, NJ

"After one of our employees injured himself lifting a roll of carpet we purchased a machine. With over 40 floor layers we haven't had an injury since."

Rick Dehmer
Acoustic Associates
Palatine, IL

"It takes a two man job and turns it into a one man job in the fraction of the time."

Chris Bates
Bates Carpet & Furniture Center
Elkins, WV

THOUSANDS OF OUR CUSTOMERS APPROVE!!

"The ACCU-CUT machine is simple and easy to use. It works well for cutting both carpet and vinyl. The time it saves is incredible! Besides, its cutting ability, we like the fact that we can get an accurate measurement on our rolls of product. It's a fantastic machine!"

Don Perkins
Mid State Flooring
Hendersonville, TN

"I have been using an Accu-Cut machine for over 8 years. I remember what it was like not having one. I do know this machine makes my job much easier. It saves time and as you know that equals money."

Steven Willis
D & D Carpet
Cathedral City, CA

"We have had our cutting machine for close to 10 years and have been extremely happy with it. We are limited on our warehouse space which makes cutting large rolls of carpet very difficult. With the cutting machine we are able to make multiple cuts of carpet in a very short amount of time. The machine is very easy to operate and saves us time on a daily basis. It has required very little maintenance and works very well."

Dana Christianson
Sumner Carpet One
Sumner, WA

"The biggest mistake is that I didn't buy this machine many years ago."

Mark Beams
Beams Quality Flooring
Twin Falls, Idaho

"The Accu-Cut machine is phenomenal. This one machine has helped us reduce costs and mistakes and streamlined our process. We are now able to get more carpet cut per hour than we used to. It helps eliminate mistakes and reduce the margin for human error when measuring each cut. It is also very useful in rolling up remnants to sell or store in our warehouse. I would highly recommend this machine to anyone looking to enhance their business."

Brian McGee
Mid-West Floor
St. Louis, MO

"I have had an Accu-Cut machine for over 15 years and it has been a blessing in disguise. It never calls in sick, it doesn't talk back, and it does not require health insurance and performs the work of 2 men. Also we have the service technicians come out once a year for a modest price and review things with the operator and tweak whatever needs to be tweaked allowing us to have un interrupted service. I don't ever recall a time when the machine has ever broke down or was unable to perform the tasks we ask of it. If you want a reliable machine the Accu-Cut is the way to go, its one of my best employees."

John Marano
We'll Floor "U"
Hampton Bays, NY

"With our volume increasing, there would have been no way we could have survived without that machine. Not only did it cut down the amount of time it took us to service our clients but it made our accuracy on sizing on point. Our Accu-Cut machine has been an essential part of our company's success."

Elizabeth Hibbard
Synthetic Grass Warehouse
Anaheim, CA

COST SAVINGS

The main reason most companies are unsure of whether to invest in a cutting machine is because they think it will cost too much. The truth is it costs more not to own an Accu-Cut. An Accu-Cut is an investment that will pay for itself many times over in the years to come.

OVER CUTTING

"My guys only over cut a few inches – that's no big deal." It's not that you enjoy giving away free carpet and vinyl. Over cutting is probably one of your biggest profit stealers and definitely the most easily correctable with an Accu-Cut.

LABOR SAVINGS

With an Accu-Cut one employee can do in half the time what previously required two employees. One man can now unroll, measure, inspect, cut and wrap all your carpet and vinyl quickly, simply and accurately. This allows you to free up your employees time for other everyday jobs.

INVENTORY CONTROL

Know precisely how much material is on a roll before you sell a job and begin cutting a roll. With an Accu-Cut you can measure your rolls as soon as you receive them or keep a running tab to document any shortages and receive credit from your suppliers.

REDUCE CLAIMS

Inspect material before it goes out the door. By examining your carpet and vinyl before it leaves for the job site you will likely eliminate claims due to damages or flaws discovered after you've started the job on-site. Wouldn't you like to eliminate this headache?

See the examples below to see how much you could save in just one month by eliminating over cuts.

Number of rolls cut per day..... x 15
 Average "shortage" per roll x 1 yd2
 15 yd2
 Average price per square yard..... x \$10.00 yd2
 \$150.00
 Number of cutting days per month..... x 21 days
 Total amount of PROFIT
 SAVED per month..... \$3,150.00

Average number of cuts per day x 50
 Amount over cut..... x 2"
 100" = 11.1 yd2
 Number of cutting days per month..... x 21 days
 233.3 yd2
 Average price per square yard..... x \$10.00 yd2
 Total amount of PROFIT
 SAVED per month..... \$2,333.33

TAX SAVINGS

Benefits of a Non-Tax/ Capital Lease

Business owners who buy capital equipment - machinery, computers, and other tangible goods, usually prefer to deduct the cost in a single tax year, rather than a little at a time over a number of years. The benefit of a Non-Tax or Capital Leases is that they can take advantage of Section 179 and expense up to the amount allowed for the year the equipment is installed.

US Tax Code 179 Deduction

Cost of Equipment:	\$50,000.00
Section 179 Deduction:	\$50,000.00
Regular First Year Depreciation Deduction:	
Total First Year Deduction:	\$50,000.00
Cash Savings on your Equipment Purchase: (Assuming a 35% Tax Bracket)	\$17,500.00
Cost of New Equipment after Tax Savings	\$32,500.00

"One person can do the job of two people. The whole experience was great."

Todd Burrows • Wyonet Carpet Flooring America

MACHINE BENEFITS

- *One-person operation increases productivity while reducing labor dependency*
- *Cut, measure, roll, and inspect in one process, eliminating extra handling*
- *Clean, accurate cuts reduce over-cutting and material waste*
- *Built-in measuring systems improve consistency and inventory control*
- *Sell remnants and sample strips instead of discarding usable material*
- *Reduced physical strain compared to manual cutting methods*
- *Improves workplace safety and helps lower the risk of operator injuries*
- *Consistent results regardless of operator experience level*
- *Faster turnaround times for orders and daily production*
- *Heavy-duty construction designed for continuous commercial use*
- *Reliable, long service life proven in cutting rooms worldwide*
- *Lower operating costs through efficiency and reduced rework*
- *Professional presentation that enhances customer confidence*
- *Backed by decades of experience and responsive service support*

**"Great Investment
for our Flooring
Company"**

**Ty Gentry
West Point Carpet One**

Proudly Endorsed

By These Fine Groups:

Cutting Edge Technology

Accu-Cut uses a large diameter measuring wheel so that more surfaces contact with the measuring wheel is made and there is a lower chance of slippage.

Accu-Cut uses a variable speed control. This system ensures greater control to create a tighter roll-up when backrolling a remnant, and improve material inspection capability.

Circular self-sharpening cutter system
Most Accu-Cut machines feature a self-sharpening blade system. One single blade on average will last 15-20,000 cuts. Our system is much more efficient, safer and saves the customer money and lets the user cut off as little as half an inch of material at a time!

Shown here are our large roll cradles which allow for the largest of rolls.

Accu-Cut builds every machine we sell to make our product hold together better and last longer.

Accu-Cut offers on-site training to ensure your operators are utilizing their machines to maximize productivity and efficiency.

Accu-Cut uses an elevated steel foot cable to prevent accidental operation and offers greater inspection, taping and wrapping/unwrapping of rolls from anywhere around the machine.

Our non direct drive system drives more of the rollers allowing for larger rolls and less breakdowns.

Accu-Cut machines hold their value more than other machines providing you with the best investment.

"We used the competitor's machine prior to purchasing an Accu-Cut and find Accu-Cut to be a far superior product"

Terry Hosner – Carpet One - Canton, OH

IRS SECTION 179 TAX DEDUCTION

100% Tax Deduction Based On Section 179 IRS Tax Code

How Section 179 Works

Section 179 of the IRS tax code allows eligible businesses to expense qualifying equipment in the year it is placed into service, instead of depreciating it over time.

If eligible, equipment purchased and installed by December 31st may be deducted from taxable business income, subject to IRS limits and taxable income requirements.

Certain non-tax (capital) leases may also qualify for Section 179 treatment in the year the lease begins.

Why This Matters

- Reduce taxable income
- Improve cash flow
- Accelerate ROI on equipment purchases
- Keep more capital in your business

Any portion not expensed under Section 179 may be depreciated according to IRS guidelines.

Financing Still Qualifies

Many \$1 Buyout and Purchase Upon Termination (PUT) leases may allow businesses to take advantage of Section 179 while spreading payments over time.

Tax lease (true lease) options may allow 100% of monthly payments to be deducted as an operating expense.

Important Notes

- Section 179 limits are indexed annually
- Deduction cannot exceed taxable income
- Eligibility varies by business
- Election is made using IRS Form 4562

Always consult your CPA or tax advisor to confirm eligibility and benefits.

J-2 Key Features

One Person Operation

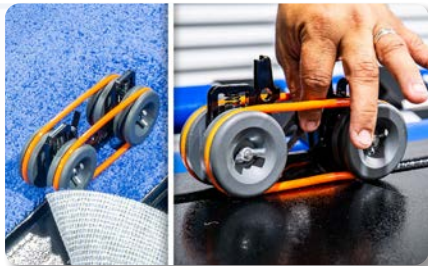

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the J-2!

Space Saving Design

The J-2's convenient fold-in cradles minimize the floor space required. At 48 inches wide, the J-2 can easily be stored under your storage rack!

Fast, Straight Cuts

Patented, two-direction, chain-driven cutter uses standard blades and applies pressure to the material being cut. Get a straight, clean cut every time!

Reverse Roll

Rolling carpet or vinyl pile/pattern side out is a simple one-person, one-step process. Keep your remnants clean and easily wrap them for display!

User Friendly Controls

Directional switches control the rollers and cutter. The yellow push buttons activate them. Speed selection switch, easy-to-use PLC interface, and emergency stop button. An auto-run feature makes operating the machine even simpler!

Touch Screen PLC Control

Advanced control system includes a foot & inch counter, preset cut storage system, security keypad, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Cut Piece Removal

All Accu-Cut machines are equipped with a cut piece dumping mechanism to offload your cut length. Make multiple cuts off of one roll without using your forklift to remove the cut length!

Dual Speed Control

The dual speed control allows users to back-roll remnants neatly and tightly around a core.

J-5

- 10 Adjustable Speeds
- Large Roll Handling
- Backrolling Efficiency

FEATURES:

- ✓ Cut 15' wide material *
- ✓ Reverse roll carpet & vinyl
- ✓ 'Infinite' variable speed control
- ✓ Open ended cradles
- ✓ Beltless load cradle
- ✓ Auto-stop, foot & inch counter
- ✓ PLC control system
- ✓ Touchscreen controls with security lock
- ✓ Two direction slotted blade cutter
- ✓ Spring assisted roll up arm
- ✓ Roll up side dump cradle
- ✓ Wrap around steel foot cable control
- ✓ Lifting brakes
- ✓ Metric counter/50 Hz power available

* Will roll up and measure 15' goods. Will cut a 15' roll up to 14', user must cut off last foot by hand.

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hz / 15 amps
*Also available in 50hz

BLADES: Standard, slotted double edge carpet blade

SIZE: 15' 8" long x 6' 8" wide x 3' 3" high

Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

J-5 Key Features

One Person Operation

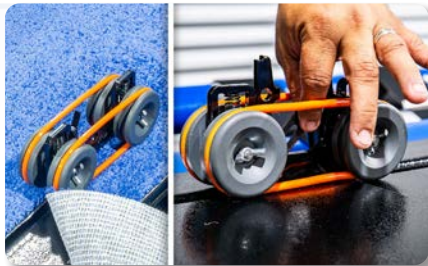

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the J-5!

Beltless Load Cradle

The J-5's open-ended, beltless load cradle holds even the largest rolls. The steel rollers center the material in the cradle. This helps to ensure the material rolls up straight every time!

Fast, Straight Cuts

Patented, two-direction, chain-driven cutter uses standard blades and applies pressure to the material being cut. Get a straight, clean cut every time!

Reverse Roll

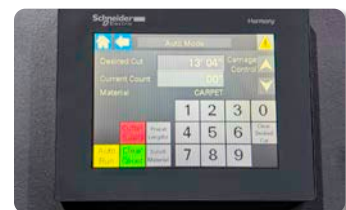

Rolling carpet or vinyl pile/pattern side out is a simple one-person, one-step process. Keep your remnants clean and easily wrap them for display!

User Friendly Controls

Directional switches control the rollers and cutter. The yellow push buttons activate them. Speed selection switch, easy-to-use PLC interface, and emergency stop button. An auto-run feature makes operating the machine even simpler!

Touch Screen PLC Control

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Cut Piece Removal

All Accu-Cut machines are equipped with a cut piece dumping mechanism to offload your cut length. Make multiple cuts off of one roll without using your forklift to remove the cut length!

Inspect Material

Material can easily be inspected as it travels across the tabletop. Inspect the carpet and vinyl before it goes out the door!

Q-7

- Roll Improvement Feature to Reduce Telescoping
- Self-Sharpening Cutting System with Circular Blade
- Extended Cutting Capability to Completely Cut 15 Ft Wide Material

FEATURES:

- ✓ One person operation
- ✓ Cut 15' wide material
- ✓ Reverse roll carpet & vinyl
- ✓ 'Infinite' variable speed control
- ✓ Open ended cradles
- ✓ Beltless load cradle
- ✓ Roll improver / roll squaring
- ✓ Auto-stop, foot & inch counter
- ✓ PLC control system
- ✓ Touchscreen controls with security lock
- ✓ Change/Sharpen blade reminder
- ✓ Numbered keypad for easy measurement entry
- ✓ Two direction circular cutter
- ✓ Spring assisted roll up arm
- ✓ Roll up side dump cradle
- ✓ Wrap around steel foot cable control
- ✓ Quick disconnect control panel
- ✓ Lifting brakes
- ✓ CE Metric /50 Hz power available

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hz / 15 amps

**Also available in 50hz*

BLADES: 5 1/2" circular, beveled edge

SIZE: 17' 8" long x 6' 8" wide x 3' 3" high

Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

Q-7 Key Features

One Person Operation

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the Q-7!

Adjustable Load Cradle

The Q-7's open-ended, beltless load cradle holds even the largest rolls. The cradle features a roll improver that adjusts the position of the roll. This ensures you get a square cut and that the material rolls up straight every time!

Circular Cutter

Self-sharpening circular blade rotates as it moves down the cutting track. The hold-down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency!

Reverse Roll

Rolling carpet or vinyl pile/pattern side out is a simple one-person, one-step process. Keep your remnants clean and easily wrap them for display!

User Friendly Controls

Directional switches control the rollers – the yellow push button activates them. Speed selection dial, expanded PLC interface, and emergency stop button. An auto-run feature makes operating the machine even simpler!

Touch Screen PLC Control

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Cut Piece Removal

All Accu-Cut machines are equipped with a cut piece dumping mechanism to offload your cut length. Make multiple cuts off of one roll without using your forklift to remove the cut length!

Inspect Material

Material can easily be inspected as it travels across the tabletop. Inspect the carpet and vinyl before it goes out the door!

Q-9

- Exceptional Capability For Large Rolls
- Automated Roll Tracking and Adjustment
- Effortless Material Roll-up and Disposal
- Dual-Side Disposal Capability

FEATURES:

- ✓ Cut 15' wide material
- ✓ Reverse roll carpet & vinyl
- ✓ 'Infinite' variable speed control
- ✓ Open ended cradles
- ✓ Roll improver / roll squaring
- ✓ Pivoting, squaring load cradle
- ✓ "Clam Shell" load cradle
- ✓ Shuttle load cradle
- ✓ Auto-stop, foot & inch counter
- ✓ PLC control system
- ✓ Numbered keypad for easy measurement entry
- ✓ Photo sensor, auto-adjusting eyes
- ✓ Change/Sharpen blade reminder
- ✓ Lifting brakes
- ✓ Touchscreen controls with security lock
- ✓ Two direction circular cutter
- ✓ Air powered roll up arm
- ✓ Air powered roll up side dump cradle
- ✓ Air powered load side dump cradle
- ✓ Wrap around steel foot cable control
- ✓ Quick disconnect control panel
- ✓ CE / Metric Counter / 50 Hz power available
- ✓ Touch button roll-up and dumping
- ✓ Material can be removed at the touch of a button
- ✓ Expandable clamshell cradle at the touch of a button
- ✓ Motion sensors automatically sense any shifting and correct the roll by itself so it rolls up perfect

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hz / 15 amps
*Also available in 50hz

BLADES: 5 1/2" circular, beveled edge
SIZE: 17' 1" long x 7'6" wide x 3' 10" high
Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

Q-9 Key Features

One Person Operation

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the Q-7!

Adjustable Squaring Cradle

The Q-9's load cradle can be adjusted in three ways: shuttle forward or backward for positioning, pivot for squaring the roll, and use the "clam shell" design to adjust for roll diameter. Effortlessly provides full control over the material!

Circular Cutter

Self-sharpening circular blade rotates as it moves down the cutting track. The hold-down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency!

Reverse Roll

The Q-9's advanced double roller re-roll system tightly re-rolls material providing a simple one-step process for reverse rolling. Keep your remnants clean and easily wrap them for display!

User Friendly Controls

Directional switches control the rollers, and the yellow push button activates them. Speed selection dial, easy-to-use expanded PLC interface, and emergency stop button. Pneumatically powered roll-up arm and load cradle make operating the machine even simpler!

Touch Screen PLC Control

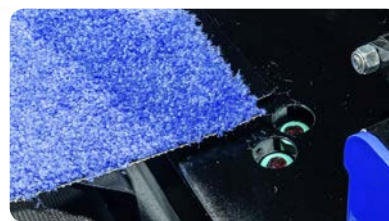

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Material Removal

Air-powered dumping mechanisms will remove the carpet or vinyl from both the roll-up cradle and the load cradle. Add a roll feeding table for the ultimate in cutting efficiency!

Anti-Cone Control

As material moves across the tabletop, electric eyes detect any movement and quickly adjust the load cradle forward or backward to the proper position. Automatically eliminates any walking or coning!

X-33

- All features from other machines **PLUS**
- Seven foot Inspection Area
- Automated Operation - advances material, lowers arm, resets counter, roll-up process, adjust roll as necessary and stops at programmed length!

FEATURES:

- ✓ Cut 15' wide material
- ✓ Reverse roll carpet & vinyl
- ✓ 'Infinite' variable speed control
- ✓ Open ended cradles
- ✓ Roll improver / roll squaring
- ✓ Pivoting, squaring load cradle
- ✓ "Clam Shell" load cradle
- ✓ Shuttle load cradle
- ✓ Large inspection area - 15' x 7'
- ✓ Auto-stop, foot & inch counter
- ✓ PLC control system
- ✓ Numbered keypad for easy measurement entry
- ✓ Photo sensor, auto-adjusting eyes
- ✓ Change/Sharpen blade reminder
- ✓ Touchscreen controls with security lock
- ✓ Two direction circular cutter
- ✓ Air powered roll up arm
- ✓ Air powered load side dump cradle
- ✓ Wrap around steel foot cable control
- ✓ Quick disconnect control panel
- ✓ Lifting brakes
- ✓ CE / Metric counter / 50 Hz power available
- ✓ Touch button roll-up and dumping
- ✓ Material can be removed at the touch of a button
- ✓ Expandable clamshell cradle at the touch of a button
- ✓ Motion sensors automatically sense any shifting and correct the roll by itself so it rolls up perfect

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hz / 15 amps
*Also available in 50hz

BLADES: 5 1/2" circular, beveled edge
SIZE: 17' 1" long x 11' 9" wide x 3' 10" high
Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

X-33 Key Features

One Person Operation

Wrap-around foot cable control, air-powered roll-up arm, speed control, auto-run feature, adjustable load cradle, and automatic anti-cone control provide for ease of use. All are standard features on the X-33!

Adjustable Squaring Cradle

The X-33's load cradle can be adjusted in three ways: shuttle forward or backward for positioning, pivot for squaring the roll, and use the "clam shell" design to adjust for roll diameter. Effortlessly provides full control over the material!

Circular Cutter

Self-sharpening circular blade rotates as it moves down the cutting track. The hold-down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency!

Inspect Material

The X-33's six-foot inspection area includes a stainless steel tabletop where material can easily be examined. Inspect the carpet and vinyl before it goes out the door!

Automated Operation

Program in the desired measurement and press the "Go" button. The X-33 will advance the material, lower the hold-down arm, reset the counter, begin the roll-up process, monitor and adjust the roll as necessary, then stop at the programmed length. Automatically, effortlessly, and rapidly!

Touch Screen PLC Control

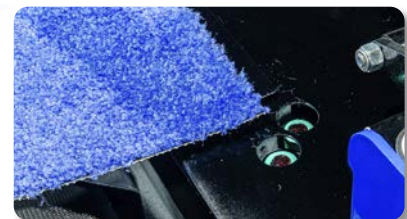

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

X-77 Key Features

One Person Operation

Wrap-around foot cable control, air-powered roll-up arm, speed control, auto-run feature, adjustable load cradle, and automatic anti-cone control provide for ease of use. All are standard features on the X-77!

Adjustable Squaring Cradle

The X-77's load cradle can be adjusted in three ways: shuttle forward or backward for positioning, pivot for squaring the roll, and use the "clam shell" design to adjust for roll diameter. Effortlessly provides full control over the material!

Circular Cutter

Self-sharpening circular blade rotates as it moves down the cutting track. The hold-down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency!

Inspect Material

The X-77's 14' 11" inspection area includes a stainless steel tabletop where material can easily be examined. Inspect the carpet and vinyl before it goes out the door!

Automated Operation

Program in the desired measurement and press the "Go" button. The X-77 will advance the material, lower the hold-down arm, reset the counter, begin the roll-up process, monitor and adjust the roll as necessary, then stop at the programmed length. Automatically, effortlessly, and rapidly!

Touch Screen PLC Control

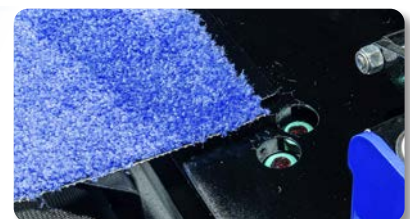

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Material Removal

Air-powered dumping mechanisms will remove the carpet or vinyl from both the roll-up cradle and the load cradle. Add a roll feeding table for the ultimate in cutting efficiency!

Anti-Cone Control

As material moves across the tabletop, electric eyes detect any movement and quickly adjust the load cradle forward or backward to the proper position. Automatically eliminates any walking or coning!

ARTIFICIAL TURF CUTTING MACHINE

T-12

FEATURES:

- ✓ Cut 15' wide material
- ✓ Reverse roll carpet & vinyl
- ✓ 'Infinite' variable speed control
- ✓ Open ended cradles
- ✓ Roll improver / roll squaring
- ✓ Pivoting, squaring load cradle
- ✓ "Clam Shell" load cradle
- ✓ Shuttle load cradle
- ✓ Auto-stop, foot & inch counter
- ✓ PLC control system
- ✓ Touchscreen for easy measurement entry
- ✓ Photo sensor, auto-adjusting eyes
- ✓ Touchscreen controls with security lock
- ✓ Change/Sharpen blade reminder
- ✓ Two direction circular cutter
- ✓ Low impact turf hold down wheel
- ✓ Air powered roll up arm
- ✓ Air powered roll up side dump cradle
- ✓ Air powered load side dump cradle
- ✓ Wrap around steel foot cable control
- ✓ Quick disconnect control panel
- ✓ Lifting brakes
- ✓ Integrated Metric/Imperial Counter
- ✓ Touch button roll-up and dumping
- ✓ Material can be removed at the touch of a button
- ✓ Expandable clamshell cradle at the touch of a button
- ✓ Motion sensors automatically sense any shifting and correct the roll by itself so it rolls up perfect
- ✓ Anti-cone support arms

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hz / 15 amps*

*CE/Metric/50HZ available

BLADES: 4.5" circular, beveled edge

SIZE: 18' 6" long x 7' 9" wide x 3' 10" high

Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

T-12 Key Features

One Person Operation

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the Q-7!

Adjustable Squaring Cradle

The T-12's load cradle can be adjusted in three ways: shuttle forward or backward for positioning, pivot for squaring the roll, and use the "clam shell" design to adjust for roll diameter. Effortlessly provides full control over the material!

Circular Cutter

Self-sharpening circular blade rotates as it moves down the cutting track. The hold-down guard covers the blade and keeps material tight while cutting. Longer blade life reduces blade changes and increases efficiency!

Reverse Roll

The T-12's advanced double roller re-roll system tightly re-rolls material providing a simple one-step process for reverse rolling. Keep your remnants clean and easily wrap them for display!

User Friendly Controls

Directional switches control the rollers, and the yellow push button activates them. Speed selection dial, easy-to-use expanded PLC interface, and emergency stop button. Pneumatically powered roll-up arm and load cradle make operating the machine even simpler!

Touch Screen PLC Control

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

Anti-Cone Control

As material moves across the tabletop, electric eyes detect any movement and quickly adjust the load cradle forward or backward to the proper position. Automatically eliminates any walking or coning!

FEED TABLE

*Taking cutting efficiency
to the ultimate level!*

Improve your roll processing capacity and increase your productivity with an Accu-Cut feed table.

- One person loads rolls to be cut on the table and picks up processed rolls from underneath the table while another person processes all your cuts on the machine.
- Fully automated, industrial strength conveyor system will meet the demands of the busiest warehouses.
- Pneumatically operated loading arms provide quick and effortless operation.

- **Dimensions:**
17' long x 15' wide x 4' 4" high
- **Power Requirements:**
220 volts / 60 hz / 15 amps
- **Conveyor Storage Area:**
10' 6"
- **Pairs up with:**
Q-9, X-33, X-77, T-12 and T-44 models

"We love it. It's made cutting more efficient, we are gaining at least one hour a day. We are cutting 25-35 cuts per day."

Chadwick Powell
Carpet One of Tulsa

OFF-LOAD TABLE

Our off load table allows the user to easily move cut pieces away from the user and over to a separate staging area

www.accu-cut.com/offloadtable

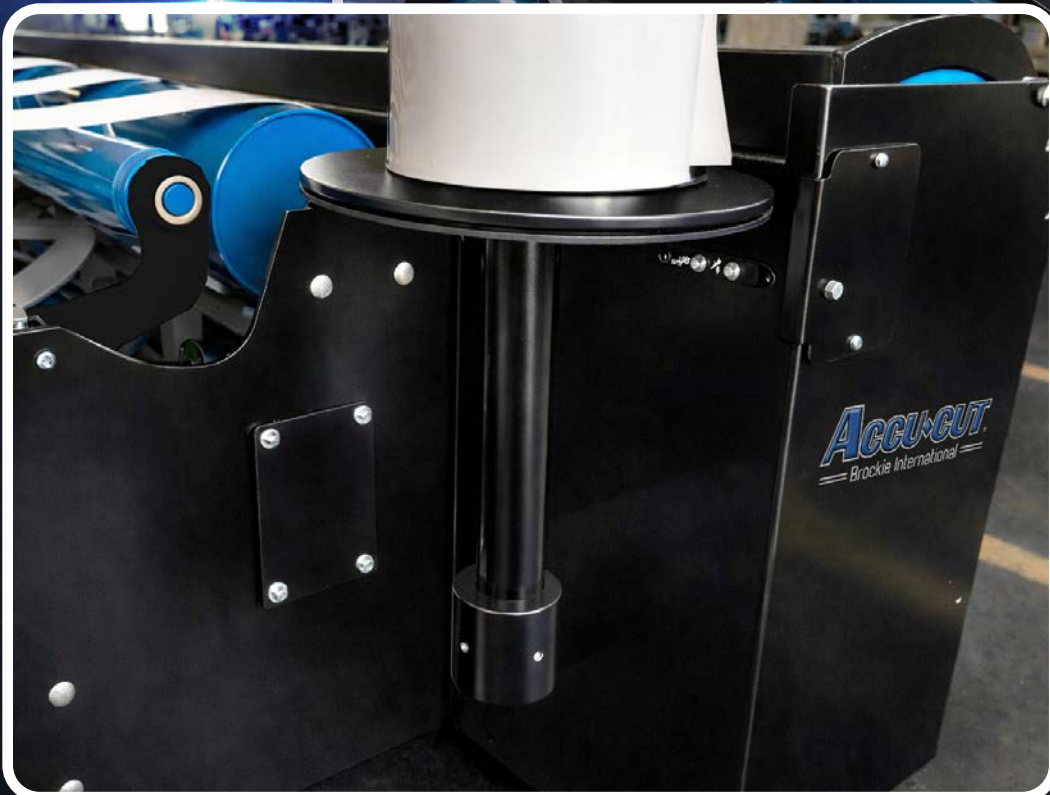

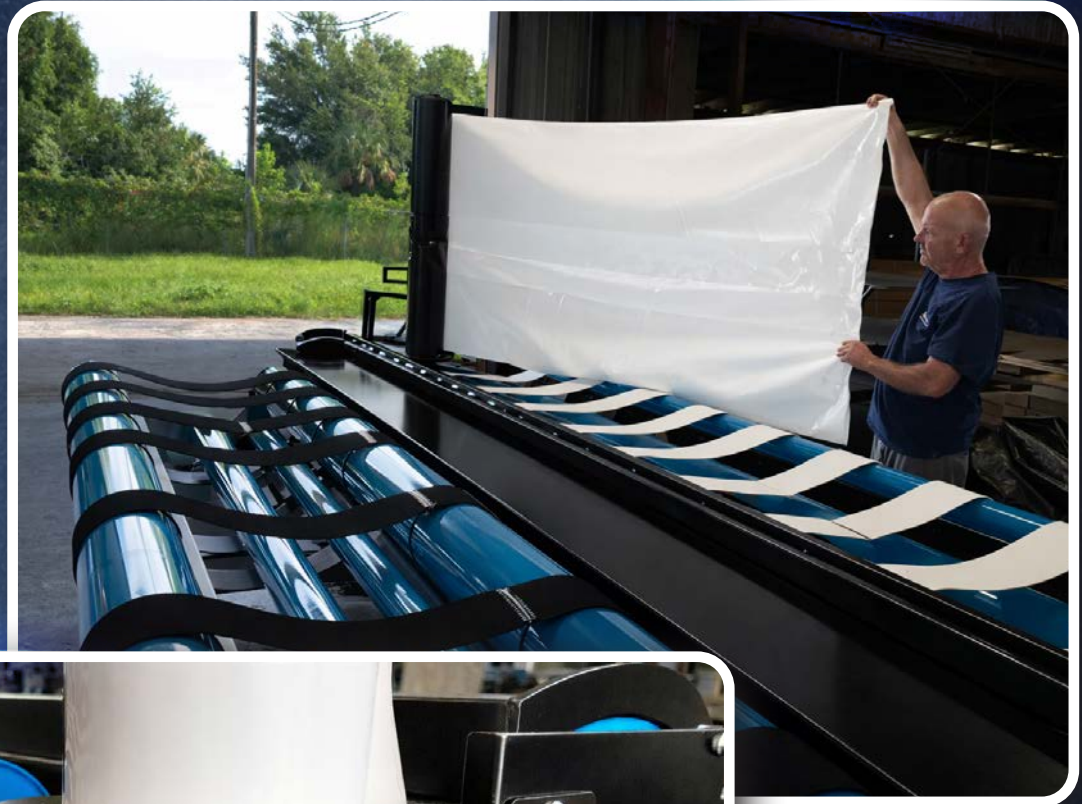

AUTOMATIC WRAP DISPENSER

Our automated wrap dispenser allows the user to seamlessly tape up cuts and roll balances with stretch wrap with the turn of a switch.

MOUNT for Heavy Duty Plastic Wrap

Our mount for heavy duty plastic allows the operator to fully wrap material for transport or storage.

This dynamic machine features pneumatically tilting cradles on both the load and roll-up sides. It measures, rolls, and cuts hard-surface rolled goods up to 2 meters wide, ensuring daylong operation without any strain on the operator.

- **Foot Cable Control:** Enables operation away from the control panel, ideal for wrapping or taping a roll
- **Simple Operation:** Directional switches, cutter button and PLC interface provide user friendly controls
- **Circular Cutter Blade:** Makes thousands of cuts before needing replacement and provides a clean, straight cut

Specs: Dimensions: 9'6" L x 5'4" W x 4'5" H (2.90m x 1.63m x 1.35m)
Weight: 1492 lbs (676.91 kg)

ROLL SPLITTER ATTACHMENT

The Accu-Cut Roll Splitter provides a simple yet effective tool for splitting carpet and vinyl on your Accu-Cut Cut & Roll Machine. Detailed below are specifications for assembling and operating the Roll Splitter. Should you have any questions concerning your roll splitter please call **1-800-ACCU-CUT** (1-800-222-8288).

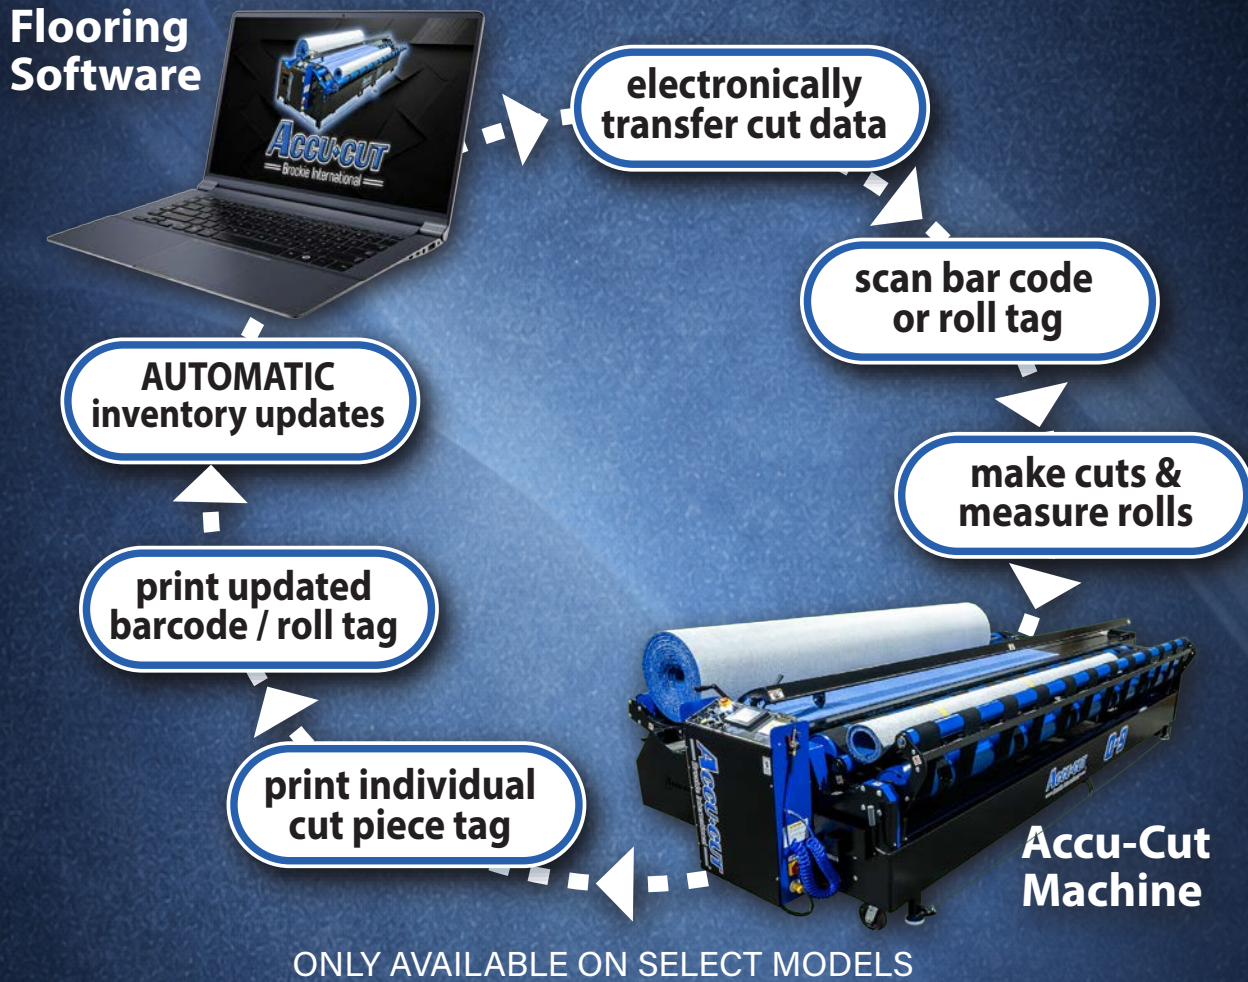

ASSEMBLY & OPERATION

- Place the cutter head in the desired position with the blade facing the carpet.
- Using a tape measure, position the splitter so the material will be cut to the desired width.
- Advance the material to roll splitter and pull on the material for the first few feet – if your machine is equipped with variable speed control set the speed at the lowest setting.
- Continue advancing the material into the roll-up cradle keeping the outside edge of the material flush with the guide handle.

Note: If you are measuring the roll you are splitting, reset your counter to zero when the material is centered with the cutting track.

SOFTWARE INTEGRATION

Take your Accu-Cut to the next level of technology and achieve complete control over your inventory when you link your cutting machine to your flooring software.

Features

- Always know exactly how much material remains on the roll.
- Ensure wrong material is not cut.
- Print tags to clearly identify cuts for installers.
- Electronically log discrepancies in roll length.
- Automatically update inventory in flooring software.
- Generate comprehensive inventory activity reports.

DELIVERY, TRAINING & WARRANTY

Your Accu-cut machine will be delivered directly to your door by a common carrier transport company. Our professional logistics department will work around your schedule to make the delivery process as easy as possible and will keep you advised as to when to expect your Accu-Cut machine. On site training is available for a fee. You and your personnel will receive an extensive training session performed by an Accu-Cut certified trainer to ensure how to efficiently operate your new Accu-Cut machine.

Our machines come with a 1 year parts and labor warranty and a 3 year frame warranty. Our dedicated service department will be there for you and your machine should you ever need assistance. Accu-Cut strives to take care of our customers and our machines. We know that equipment needs the proper care and attention it deserves and this is why Accu-Cut offers Annual Preventive Maintenance Programs performed by a certified Accu-Cut technician. Our service team is available 7 days a week and offers FREE technical support.

"My only regret is I wish I had done it sooner".

**Tom Brewer, Brewer Carpet
Oklahoma City, OK**

"I have owned Accu-Cut machines for over 10 years and will be more than happy to have anyone call or visit my showroom for a demo. I wish everything ran as well as my Accu-Cut machine".

**Carlos Hernandez
Commerce, CA - Hernandez Carpet**

"I own 8 stores with 8 Accu-Cut machines that I have been buying since 1992. We have updated our machines at least 3 times to keep up with the latest innovations. I feel each one replaces 1 employee. The best part of the machines is, they are never late to work, there is no health insurance or workman's comp claims and they never go on vacation!"

Jerry Hamernick - GCO Carpet Outlets - Duluth, MN

"We shopped the machines heavily and definitely made the right choice"

**Adam Elyacher, Big Bob's Flooring
Shawnee Mission, KS**

"The best investment this company has ever made" .
Floor Factors, Portland, Oregon

"Accu-Cut has provided great support from the beginning. We'll never go back to cutting on the floor!"
Carpet City, Wisconsin Rapids, Wisconsin

We are glad to have this machine. It saves a tremendous amount of time, as long as it is working properly. As with any piece of equipment proper maintenance is key. I just want to add that we have enjoyed working with Robbie in the Service Dept. He has always been helpful, and the Techs that are sent to do maint or repairs do a great job too. I remember back in the day when we had to roll carpet out and cut it on the floor so this machine has been a great help and would highly recommend one to others seeking cutting equipment.

Dan - Rugworks - Durham, NC

FREQUENTLY ASKED QUESTIONS

Q: Are the machines portable?

A: All our machines are on wheels and are portable. The X-33 model requires 2 people to move it though. A lot of our customers store their machines under their carpet racks when they aren't using them.

Q: What kind of warranty comes with the machine?

A: Our machines come with a limited one year parts and labor warranty. Preventative maintenance visits are available.

Q: Can you cut vinyl on the machine as well?

A: Our machines work with carpet AND vinyl.

Q: Does the machine work with 15 foot goods?

A: All of our machines will roll and measure 15 foot wide carpet and vinyl. (Some of our models will cut 15 foot goods completely for you while the others require you to cut the last foot and a half by hand.)

Q: Is financing available?

A: Financing terms are available up to 84 months. All finance plans can be paid off after 1 year for principal only and no penalties.

Q: Can I trade my machine in down the road?

A: Yes, we offer very good trade-in values should you decide you would like to upgrade your machine.

Q: Can you back-roll remnants on the machine?

A: All of our machines will allow the person using it to measure a piece of carpet or vinyl and roll it face out into a remnant in one step.

Q: How do you tape up or wrap material?

A: Foot cables are mounted on every machine so the person using the machine can activate the rollers from any where on the machine. This lets the user tape up or wrap the carpet or vinyl on the right side of the machine as well as the left side where the roll balance is left over.

Q: Who will service my machine?

A: We are proud that we can offer service on our machines in several areas around the USA and Internationally. We have our own traveling technicians that travel all over the USA as well as several service partnerships around the World.

Q: How long do these machines typically last?

A: We have customers that have bought their machines over 20 years ago and are still using them now. If you take care of your machine it can serve you for many years.

Q: How much room is needed to accommodate a machine?

A: The average machine about is 6' wide by 16' long.

Besides the space the machine occupies, the machine user has to have room to run the forklift and floor space to dump cuts.

A 40' x 10' space is adequate to fully run the machine and the forklift.

FINANCING

Pay Off After 1 Year For Principle Only with No Penalties! Still Take Advantage of Section 179 Tax Deduction If You Finance!

Most companies find leasing as the smartest way to secure equipment. They can get the equipment needed to run the day to day business, while conserving cash for growth.

Benefits of Leasing

- It Doesn't hurt cash flow
- Doesn't tie up credit lines
- There is no personal guarantee required in most cases
- It doesn't go on the owner's personal credit report
- There are no personal credit checks required **
- No Bank account information is needed **
- Machine can be bought out early for principle only w/ no penalties
- Competitive Rates & No Money Down!

** (in most cases)

The length of a lease varies according to a customer's individual requirements. Lease terms vary from one to six years.

At the end of the lease period you will own the machine for \$1.00

We offer great trade-in values if you would like to upgrade your machine at the end of the lease term. It is a convenient, quick and effective process. Most businesses qualify for lease financing - in fact, you can apply for a lease right now!

Get approved today by calling

**1-800-ACCU-CUT
(222-8288)**

or 1-352-742-0902

**Or fill out our online credit application at
www.accu-cut.com/creditapplication**

Leasing can also:

- Offer better asset management
- Minimize tax obligations
- Make budgeting easier
- Protect against obsolescence
