\*Also available in 50hz

BLADES: Standard, slotted double edge carpet blade

SIZE: 15' 8" long x 6' 8" wide x 3' 3" high

Limited Warranty: 1 year parts & labor

Meets all UL and CSA safety standards.

# J-5 Key Features

## One Person Operation

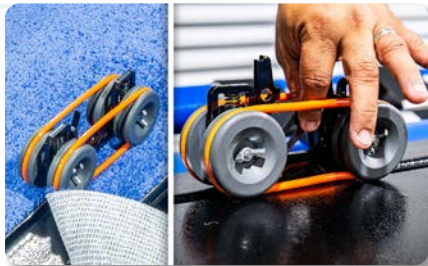

Wrap-around foot cable control, spring-loaded roll-up arm, speed control, auto-run feature, and open-ended cradles provide for ease of use. All are standard features on the J-5!

## Beltless Load Cradle

The J-5's open-ended, beltless load cradle holds even the largest rolls. The steel rollers center the material in the cradle. This helps to ensure the material rolls up straight every time!

## Fast, Straight Cuts

Patented, two-direction, chain-driven cutter uses standard blades and applies pressure to the material being cut. Get a straight, clean cut every time!

## Reverse Roll

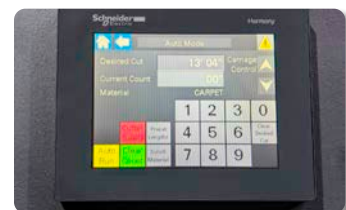

Rolling carpet or vinyl pile/pattern side out is a simple one-person, one-step process. Keep your remnants clean and easily wrap them for display!

## User Friendly Controls

Directional switches control the rollers and cutter. The yellow push buttons activate them. Speed selection switch, easy-to-use PLC interface, and emergency stop button. An auto-run feature makes operating the machine even simpler!

## Touch Screen PLC Control

Includes a touchscreen foot & inch counter, preset cut storage system, security keypad, cut counter, change blade reminder, multiple product settings, and more. The machine will automatically stop precisely at the programmed length!

## Cut Piece Removal

All Accu-Cut machines are equipped with a cut piece dumping mechanism to offload your cut length. Make multiple cuts off of one roll without using your forklift to remove the cut length!

## Inspect Material

Material can easily be inspected as it travels across the tabletop. Inspect the carpet and vinyl before it goes out the door!
