

IVC-15

The IVC-15, featuring pneumatic controls, will quickly process even the largest rolls of flooring.

Accu-Cut Advantage

- Circular cutter
- Pneumatic controls
- High capacity cradles
- Fully process 15' goods

- ◆ One person can unroll, inspect, measure, cut, reverse roll and wrap all your carpet and vinyl simply and accurately.
- ◆ User friendly Programmable Logic Controller - PLC - ensures accuracy for all types of flooring no matter how thick the pile or what type of backing.
- ◆ Designed to accommodate the largest rolls of carpet and heaviest rolls of vinyl, the IVC-15's 'clam shell' load cradle will process your cut orders accurately and efficiently.
- ◆ Automatic variable speed control allows the user to choose a comfortable speed or slow down the machine for inspection.
- ◆ The IVC-15 can easily be moved on its industrial strength casters. Leveling legs raise the machine off the floor and keep it stationary.
- ◆ Wrap around foot cable control provides the operator with a way to engage the rollers from the front or side of the machine. Auto-run feature makes wrapping and taping rolls simple.

SERVICE ♦ QUALITY ♦ INTEGRITY

A CCU-CUT

Brodie International®

IVC-15

The IVC-15's advanced double roller re-roll system tightly re-rolls material providing an effortless one-step process for reverse rolling.
Keep your remnants clean and easily wrap them for display!

REVERSE ROLL

CIRCULAR CUTTER

Self-sharpening circular blade rotates as it moves down the cutting track. Hold down guard covers the blade and keeps material tight while cutting. **Longer blade life reduces blade changes and increases efficiency!**

'Infinite' speed control dial directs the variable frequency drives which automatically adjust each cradle to the proper speed.
This advanced feature makes the IVC-15 even more user friendly!

ADVANCED VARIABLE SPEED

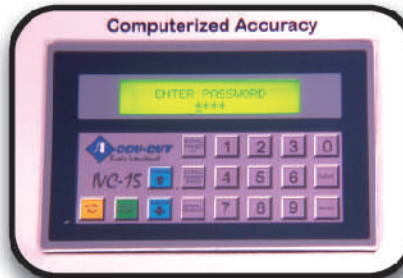

INSPECT MATERIAL

Material can easily be inspected as it travels across the tabletop. **Inspect the carpet and vinyl before it goes out the door!**

The IVC-15's pneumatically controlled load cradle can be adjusted in three ways: shuttle forward or backward for positioning, pivot either end for squaring the material or use the 'clam shell' design to adjust for roll diameter. **Provides full control!**

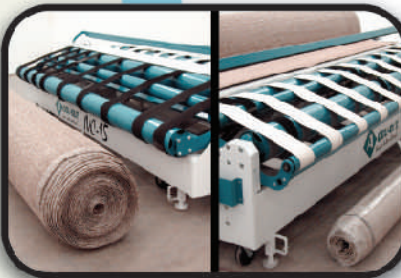

ADJUSTABLE, SQUARING CRADLE

PLC CONTROL

PLC system includes an auto-stop foot & inch counter, cut storage system, security keypad, cut counter, change blade reminder, multiple product settings and more. **The PLC communicates with most flooring software programs for bar code capability!**

Dumping mechanisms will remove the cut piece from the roll-up cradle and remove the material from the load cradle. **Add a roll feeding table for the ultimate in cutting efficiency!**

ROLL REMOVAL

CUTS VINYL

All Accu-Cut machines will measure, cut and roll vinyl. **You won't ever have to worry about damaging vinyl by rolling it out on the floor!**

SPECIFICATIONS:

POWER: 220 volts - single phase / 60 hertz / 15 amps
BLADE: 5 1/2" circular, beveled edge
REQUIRED AIR SOURCE: 120 PSI
SIZE: 7' 9" wide x 17' 1" long x 3' 10" high
LIMITED WARRANTY: 3 years parts, 1 year labor

Meets all UL and CSA safety standards.
