

SuperCut II

SuperCut II CONTROL PANEL

The computer's programmable control panel allows you to set the desired length of floor covering. The SuperCut II will automatically stop at the preset cut length if desired.

One operator can control the following functions:

- (1) Variable speed control dial.
- (2) Programmable digital counter.
- (3) Emergency shut-off safety button.
- (4) Forward and reverse rolling control.
- (5) Electric speed cutter switch.
- (6) Shuttle button: moves the carriage to uncone a coned roll and to square the carpet.
- (7) Remote foot control switch.

All Components are Modular with Overnight Service!
